**Medical Specialists & Facilities in Kolkata Consular District
(Updated February 2025)**

DISCLAIMER: The U.S. Consulate General Kolkata, India, assumes no responsibility or liability for the professional ability or reputation of, or the quality of services provided by, the medical professionals, medical facilities or air ambulance services whose names appear on the following lists. Inclusion on this list is in no way an endorsement by the Department of State or the U.S. Consulate General. Names are listed alphabetically, and the order in which they appear has no other significance. The information in the list on professional credentials and areas of expertise are provided directly by the medical professional, medical facility or air ambulance service; the Consulate General is not in a position to vouch for such information. You may receive additional information about the individuals and facilities on the list by contacting local medical boards and associations (or its equivalent) or local licensing authorities.

The quality of medical care in India varies considerably. Medical care in the major population centers approaches and occasionally meets Western standards, but adequate medical care is usually very limited or unavailable in rural areas. [The Health section in the Country Information section for India on the Department of State travel website](#) provides further information about health in India.

The following list of Doctors and Hospitals have been compiled by the U.S. Consulate General, Kolkata. This list is not intended to be comprehensive, as there are many competent medical professionals in the consular district.
